11/7/90

Dear Ray,

Your correctly addressed letter got her this morning. After we spoke I checked what records I have and it seems that the Les Crane show was 11/16/67. So we can place the date we discussed by that. That is when I debated Lieveler.

After we spoke I informed Mac night.

With regard to the alleged alteration of JFK's body or the alleged alteration of the pictures and X-rays, why would anyone go to all the trouble and the enormous risk of either and wind up what utterly destroys the official story the support of which is the alleged purpose of the alleged faking?

People say all sorts of things, sometimes from faulty recollection and sometimes for other reasons and are often persuasive. But that does not make what they say the truth.

With specific regard to Lifton's theory, I've checked each step of it carefully and it is impossible at each step. No matter how persuasive you found, for example, O'Connor. Read the Sibert-O'Neill report, the very paragraph to which Dave gives his special interpretation, and you'll find refutation of O'Connor there. And Dave made no mention of this in his book.

I made a FOIA request of the Military District of Washington, asking for only the records it gave him. Those records make the identification and purpose and uses of the second helicopter without question - and Lifton omitted that, too. Those records also hold what refutes his concoction and he likewise suppressed that information from his book. And check of one of the sources he uses at that point, Manchester, provides several other disproofs. So he uses Manchester selectively also.

No matter how persuasive you found people Dave uses, it just isn't so.

You should see how persuasive hundreds of concoctions I got in official, mostly FBI records, are. Particularly in the King case. One book was built on a complete fabrication that the FBI had already investigated and entirely disproved.

Good to hear from you! Hope all continues to go well with all of you,

sincerely,

A. J. F.
